Announcement for Winter Term 2024/2025

1st year DENTISTRY

Practical Lessons

The practical lessons on **Medical Chemistry, Materials in Dental Medicine** will start in the second week of the winter semester according to the issued syllabus.

Each practical lesson **starts on Friday at 14.15** in the **Student Laboratory** of our institute. Students are expected to use the cloakrooms located in Kateřinská 32, lower basement, and enter the Student Laboratory in white laboratory coats and slippers.

Before the first lesson students should await their group teacher downstairs in the hall behind entrance to Kateřinská 32 building, from where they will be guided to cloakrooms.

Each student is supposed to bring to the practical lesson a **white laboratory coat, slippers, padlock** (for the cloakroom) **water-resistant markers, writing tools**, and the written **instructions** issued for each practical lesson.

The written instructions and relevant theory files will be issued for each practical lesson and posted on the website of our institute not later than during the week preceding the lesson. Students are obliged **to read these texts in advance**, and bring them either printed or loaded to a personal electronic device (cellular phone, tablet etc.).

Unfamiliarity with the instructions can be considered as violation of the safety rules and in extreme cases may result in exclusion of such student from the practical lesson (with absence counted).

Before or at the first lesson all students are obliged to familiarize with our **Safety Rules for Work in Student Laboratory**, and strictly follow these rules ever after.

September 10th, 2024

Prof. MUDr. Tomáš Zima, DrSc., MBA
Head of the Institute
