Announcement for Winter Term 2026/2027

Pathobiochemistry

The classes on the elective subject **Pathobiochemistry 3 – Biochemical Disorders (B82433)** will be provided in the winter semester of the academic year 2026/27 according to the issued syllabus.

The course consists of 7 lectures scheduled for the 2nd – 8th week of the winter semester, followed by oral examination.

The **lectures** are held according to the schedule on **Mondays** at **16:15-17:45** in the **Lecture Hall No. 3.073, Kateřinská 32**. Topic of each lecture is specified by the syllabus.

The lectures are formally non-mandatory and attendance is not taken. However, knowledge of the lecture topics will be fully required at the exam, and so attendance at the lectures is expected, especially so as no mandatory lessons are provided in this course.

The **oral examination** will be possible to take in pre-terms after the completion of all lectures. All the exam dates, pre-terms as well as the regular ones, will be announced via the SIS. The exam questions will be revised and posted on our website in the near future.

In case of any further questions or comments, please contact MUDr. Jan Pláteník, Ph.D. (jplat@lf1.cuni.cz, tel. 224 964 587).

September 1st, 2026

Prof. MUDr. Tomáš Zima, DrSc., MBA
Head of the Institute
